

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2021 年 3 月 29 日

今日は、日本の観測も送られてきた。Mare Sirenum の南方は、相変わらず顕著な白雲が見られる。Carsten Bauer の観測では、北縁に目立った明るい場所がある。これは 3 月 27 日に見られたものと同じところだ。Rudolf A.Hillebrecht は 3 枚の画像を報告してきたが、そのいずれにも Moeris(280W,+10)の西側が暗く記録されている。かなり目った特徴である。

(by 9 observations; reported by Makoto Adachi)

2021, Mar. 29

Today, Japanese observations have also been sent. To the south of Mare Sirenum, you can still see remarkable white clouds. Carsten Bauer's observations record a prominently bright spot on the northern edge. This is the same as what was seen on March 27th. Rudolf A. Hillebrecht has reported three images, all of which darkly record the west side of Moeris (280W, + 10). This is a very noticeable feature.
