

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

日本のシーイングは非常に悪く、観測も少なかった。伊藤は、ただ一人の報告者となった。Sinus Sabaeus (320W~350W,-10)はダストに覆われ、かすかに見えている。それに比べて Mare Acidarium (20~45W,+40~55)は黒々としている。Vicent Gonzalez Cebria は処理に無理のない画像を報告した。北極地方は白雲に覆われている。南極部もかすかな白雲が広がっているようだ。

(by 5 observations; reported by Makoto Adachi)

2021, Apr. 18

Seeing in Japan was very bad and there were few observations. Ito became the only reporter. Sinus Sabaeus (320W ~ 350W, -10) is covered with dust and is faintly visible. In comparison, Mare Acidarium (20 ~ 45W, + 40 ~ 55) is darker. Vicent Gonzalez Cebria reported images that were reasonably processed. The Arctic region is covered with white clouds. It seems that faint white clouds are spreading in Antarctica.
