

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

今日は Syrtis Major 付近の観測が送られてきた。観測条件がよほど良いのだろう。かなり細かな部分まで記録されていて驚いた。画像を見る限り、この部分では暗い模様には特別な変化は見られない。NPC の南側に明るい帯が東西に見えているが、ここは Dioscuria (W305-330, +50) と Cydonia (W340-5, +53) に位置する。明るい原因はよくわからない。

2021, Jun. 13

Observations near Syrtis Major have been sent today. The observation conditions are probably very good. I was surprised that even the smallest details were recorded. As far as the image is seen, there is no special change in the dark pattern in this part. Bright bands can be seen from east to west on the south side of the NPC, located in Dioscuria (W305-330, +50) and Cydonia (W340-5, +53). I'm not sure why it's bright.
