Jorge Rallo の 2 回目の観測です。1 回目よりもよい観測条件でした。暗くなっている部分は Syrtis Major 付近かと思われませんが、スケッチには方位が示されていませんからはっきりしたことが言えません。

This is the second observation of Jorge Rallo. The observation conditions were better than the first one. The dark part seems to be near Syrtis Major, but the sketch does not show the direction, so I can not write clearly.
