

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

Clyde Foster は、今シーズンの火星観測を開始した。今の火星は南に見えるから、日本に比べると観測条件が良い。画像は IR で、主な模様が記録された。火星は今、南極冠が見えるかどうか、大きな注目点である。IR は極冠や極雲を明るく表現しないので、わかりにくい、雲らしい明るい部分が記録された。RGB 画像だと、雲が写るのではないと思われる。

2022, Jan. 23

Clyde Foster has begun observing Mars this season. Since Mars can be seen in the south, the observation conditions are better than in Japan.

Image is IR. So, the main pattern was recorded. Whether or not Mars can see the SPC is a big focus now. IR does not brightly express polar caps and clouds, so it is difficult to understand, but bright clouds-like parts were recorded. If it is an RGB image, it seems that clouds will be reflected.
