

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

興味深い画像が送られてきた。観測条件があまりよくなかったようで、詳しくは分からない。画像の下の光斑はSPCである。本当は横長の姿だが、形がうまく記録できなかったようだ。筆者が驚いたのは、画像の上に明るい部分が見えることだ。本来ここには、このような明るい模様はないはずである。位置はMeridian (;0W,-5)とIsmenius Lacus (W332, +40)との中間になる。R画像での記録なので、砂嵐の可能性もある。

2022, Mar. 08

An interesting image was sent. It seems that the observation conditions were not very good, so I don't know the details. The light spot below the image is the SPC. It's actually a horizontally long figure, but it seems that the shape could not be recorded well. What surprised me was that I could see bright areas above the image. Originally, there should be no such bright pattern here. The position is between Meridian (;0W, -5) and Ismenius Lacus (W332, +40). Since it was recorded as an R image, there is a possibility of a dust storm.
