

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

宮原は Syrtis Major (293W,+0~20)付近の観測をした。リムが明るくなっており、この付近がダスティーだということを示している。とりわけ Meridiani (0W,-5)の北側が明るく、この付近は濃い様子が分かる。Sinus Sabaeus (320W~350W,-10)は Edom (360W,2) 近くまで見えており、ダスティーな範囲はリム付近までらしい。

Miyahara made observations near Syrtis Major (293W, +0~20). The limb is bright, indicating that this area is dusty. Especially, the north side of Meridiani (0W,-5) is bright, and this area is dark. Sinus Sabaeus (320W-350W, -10) he can see up close to Edom (360W, 2). The dusty range seems to be near the limb.

(by 1 observation; reported by Makoto Adachi)
