

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2022 年 8 月 10 日 (2022, Aug,10)

観測画像では、午後 3 時に Arsia Silva Mons (W120,-3) に白雲が目立つ。昨日にも書いたが、北に広がっている。風絵によって吹き流された姿ではないように見える。北半球のリムが B 画像で白っぽいのは、リム近くのダストに水滴がまじってできたものと思われる。

On the observation image, a white cloud is conspicuous over Arsia Silva Mons (W120,-3) at 3:00 pm. As I wrote yesterday, it spreads to the north. It doesn't look like it was blown away by the wind painting. The whitish rim in the northern hemisphere in the B image is thought to be due to water droplets mixed with the dust near the limb.

(by 2 observations; reported by Makoto Adachi)
