

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2022 年 11 月 26 日 (2022, Nov. 26)

ダストストームは、(Niliacus Lacus;20~40W,+30) と Xanthe (W53,+15)を広く覆っていた。同じところを Thomas E. Williamson も観測しているが、その画像には、左のような見え方はない。かなり淡いものだということが分かる。筆者は肉眼で見ているが、ぼんやり明るくなっているのが分かる程度だった。すでに沈静化に向かっているようだ。

このところ Mare Sirenum (140W~170W,-30)南西の高緯度地方に雲がよく見えている。明け方のリムにでる朝霧だが。かなり顕著な状態になっている。左図でも、その様子が分かる。

The dust storm covered (Niliacus Lacus;20~40W,+30) and Xanthe (W53,+15) widely. Thomas E. Williamson also observed the same area, but his image does not look like the one on the left. You can see that it is quite light. I saw it with the naked eye, but I could only see that it was vaguely bright. It seems to have already calmed down.

These days, clouds are well visible in the high latitudes southwest of Mare Sirenum (140W~170W,-30). Morning fog on the limb at dawn. It's in pretty noticeable shape. This can be seen in the left figure as well.
