

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2023 年 1 月 31 日 (2023, Jan. 31)

SPH の雲は再び Electris (165W~190,-40~-53)南方に晴れ間を形成した。日本からはその姿が、正面でとらえられた。晴れ間の中央に Thyle II の暗部があり、一層暗く見えるようになっている。この様子は森田と伊藤の画像でよくわかる。Arsia Silva Mons (W120,-3)はリム付近で白雲が見えた。

The SPH cloud again formed a clear patch to the south of Electris (165W~190,-40~-53). From Japan, the figure was captured from the front. There is a dark part of Thyle II in the center of the clear space, making it appear even darker. This situation can be clearly seen in the images of Morita and Ito. Arsia Silva Mons (W120,-3) saw a white cloud near limb.

(by 9 observations; reported by Makoto Adachi)
