

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2023 年 3 月 26 日 (2023、Mar. 26)

Frank J Melillo の画像は北極を取り巻く地域がダスティーな状態を記録した。Elysium (215W,+30)も明るい、よく見ると若干赤っぽく見える。リムが低緯度で黄色く明るくなっていて、この付近 (Amazonis (120W~170W, -5~+30)付近) は淡くダストに覆われているらしい。

Frank J Melillo's images document the dusty conditions surrounding the North Pole. Elysium (215W,+30) is also bright, but if you look closely, it looks reddish here. The limb is yellow and bright at low latitudes, and this area (around Amazonis (120W~170W, -5~+30)) seems to be faintly covered with dust.

(by 2 observations; reported by Makoto Adachi)
