

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2023 年 4 月 5 日 (2023, Apr. 05)

今日は、ヨーロッパからほぼ同じ経度の報告が集まった。3枚の画像からは、どれも同じ様子が見える。Chryse (35W,+10)から Tharsis (80W~120W,+10)にかけてはダスティーで、東西方向に明るい。Chryse ・ Xanthe と Tharsis は微妙に色が違う。Solis Lacus (W90;-28)よりも南は晴れていて暗く見える。

Today, reports of almost the same longitude were gathered from Europe. All three images look the same. Chryse (35W, +10) to Tharsis (80W~120W, +10) is dusty and bright in the east-west direction. Chryse · Xanthe and Tharsis have slightly different colors. It looks clearer and darker to the south than Solis Lacus (W90;-28).

(by 3 observations; reported by Makoto Adachi)
