

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2023 年 4 月 29 日 (2023、Apr. 29)

Rudolf A. Hillebrecht と Raimond Sedrani の画像では東端に Tharsis (80W~120W,+10)の火山の雲が記録された。実際にはもう少し淡いが、リムにあるため明るさが強調された。Mare Sirenum (140W~170W,-30)はここしばらく淡く見えているが、今日も淡く記録された。

Images of Rudolf A. Hillebrecht and Raimond Sedrani recorded the volcanic cloud of Tharsis (80W~120W, +10) at the eastern edge. It's actually a bit paler, but the brightness was emphasized because it's on the limb. Mare Sirenum (140W~170W, -30) has been faint for some time, and was recorded faint today.

(by 2 observations; reported by Makoto Adachi)
