

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2023 年 5 月 10 日 (2023、May. 10)

日本の観測条件は良くなった。Syrtis Major (293W,+0~20) 北方の淡い模様が記録されている。伊藤の画像では Ishidis (270W,+23) の白雲が記録されている。今シーズンは低緯度地方の赤道帯霧（氷晶雲）が記録されていない。視直径が小さく、青画像は撮影が難しいことが要因かもしれないが、B 画像での記録がほとんどない。

Observing conditions in Japan have improved. Syrtis Major (293W,+0~20) A faint pattern is recorded to the north. A white cloud of Ishidis (270W,+23) is recorded in Ito's image. No low-latitude equatorial fog (cryofog) has been recorded this season. This may be due to the fact that it has a small visual diameter and is difficult to photograph blue images, but there are almost no records of B images.

(by 2 observations; reported by Makoto Adachi)
