阿久津の画像は、Hellas は白く明るい、北の方に広い範囲が白くなっているのがよくわからない。Stanislas Maksymowicz の観測では南極雲が明るく記録されている。この Ls からはしばらく見えにくい時期が続くと思われる。

In Akutsu's image, Hellas is white and bright, but it is not clear that there is a wide area of whiteness north of Hellas. Stanislas Maksymowicz's observation records the Antarctic cloud as bright. It is expected to remain difficult to see for some time from this Ls.
