

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2023 年 5 月 23 日 (2023, Jun. 23)

伊藤の画像には NPC の左側（北緯 30° 付近まで）にダストが記録された。6 月 21 日にも記録されているが、その時は北緯 40° 位までだったから、その時よりも南側に拡散した様子が分かる。シーイングは、かなり悪かったようだが、stack only の画像にも色合いがよく記録されている。Elysium (215W,+30)は目立たない。

Dust was recorded on the left side of the NPC (up to around 30 degrees north latitude) in Ito's image. It was also recorded on June 21, but at that time it was up to latitude 40° N, so we can see how it spread further south than at that time. Seeing was pretty bad, but the colors are well recorded in the stack only image. Elysium (215W, +30) is inconspicuous.

(by 1 observation; reported by Makoto Adachi)
