

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2023 年 5 月 25 日 (2023, May, 25)

Olympus Mons (135W,+25)北方のダストは、範囲の拡大が収まり、少し衰退気味になった。今日は3人からの報告を受けたが、3人とも南緯 10° 位に赤道帯霧（氷晶雲）を観測している。Ls は 70° になり、南極雲が淡く見える。これは通常の見え方である。

The dust to the north of Olympus Mons (135W,+25) slowed down as the expansion of its range subsided. We received reports from three people today, and they all observed equatorial fog (cryofog) at about 10 degrees south latitude. Ls becomes 70 degrees, and the S.P.C. looks faint. This is the normal appearance.

(by 3 observations; reported by Makoto Adachi)
