

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2024年2月16日 (2024, Feb. 16)

セブ島の阿久津からの最初の観測報告があった。観測条件がまだ悪く、本来見えていいはずの南極冠が分からなかった。この時期は、淡い朝霧が時々見える時期で、この画像でも朝霧らしき様子が分かる。Syrtis Major (293W,+0~20) の姿も、その下にうっすらと見えている。

The first observation report was made from Akutsu, Cebu Island. Observation conditions were still poor, and the polar cap, which should have been visible, could not be seen. At this time of year, you can sometimes see a light morning mist, and you can see what looks like morning mist in this image. Syrtis Major (293W,+0~20) can also be seen faintly below.

(by 1 observation; reported by Makoto Adachi)
