

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

筆者だけの観測になった。今シーズン最初の眼視観測である。模様はかろうじて分かるが、本当は濃い部分がもう少し北に位置しているはずだった。シーイングが悪く、位置取りを間違ってしまった。しかし、この時は、肉眼で見ても SPC は見えていた。ダークフリンジは見えないものの、白く明るい姿を確かめることができた。色は黄色くは見えなかった。シーイングの良くなる時間を待っていると、青空の中の観測になり、模様を見極める条件は当分悪いままになるだろう。

This was just my observation. This is the first visual observation of the season. I could barely make out the pattern, but the dark part was actually supposed to be a little further north. Seeing was bad and I made a mistake in positioning. However, at this time, the SPC was visible to the naked eye. Although I couldn't see the dark fringe, I was able to make out a bright white appearance. The color didn't look yellow. If we wait for the seeing to improve, we will be observing in the blue sky, and the conditions for discerning the pattern will remain poor for the time being.

(by 1 observation; reported by Makoto Adachi)
