

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

Clyde Foster の IR 画像には Meridiani (0W,-5)が写っている。しかし、形がやせた姿をしている。Margaritifer Sinus (23W;-10)との間が明るく記録されているのが気になるが、一人だけの観測であることと、単波長の観測がないため、状況はよくわからない。

Meridiani (0W,-5) is visible in the IR image by Clyde Foster. However, it looks thin. I'm concerned about the bright area between it and Margaritifer Sinus (23W;-10). However, since there was only one observer and there were no single-wavelength observations, the situation is unclear.

(by 1 observation; reported by Makoto Adachi)
