

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2024 年 4 月 30 日 (2024, Apr. 30)

今日は Clyde Foster だけの観測だった。毎日のように観測して報告が届くのは、大変ありがたい。Meridiani (0W,-5)付近は、今日も大きな変化はない。Edom (360W,2)が明るく写っているが、これは画像処理によって明るくなったためだろうと思う。Pandorae Fretum (330W-10W, -23)が暗く記録されているが、今年の特徴だと思われる。

Only Clyde Foster observed today. I am very grateful for the reports I receive almost every day. There is no significant change around Meridiani (0W,-5). Edom (360W,2) appears bright, but I think this is due to the brightening caused by image processing. Pandorae Fretum (330W-10W, -23) appears dark, but this is probably a characteristic of this year.

(by 1 observation; reported by Makoto Adachi)
