

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

井上の観測条件は非常に悪かったようだが、それでも重要な情報が記録された。中央には Mare Sirenum (140W~170W,-30)の先端があつて、右に Mare Sirenum の本体が見える位置の観測だが、Mare Sirenum の本体が記録されていない。その代り、その位置が黄色っぽく明るく記録されている。筆者も同じころに観測していたが、Mare Sirenum は淡く見えていた。観測条件が引き起こした問題だろう。

Inoue's observation conditions were very poor, but he still recorded important information. In the center is the tip of Mare Sirenum (140W~170W,-30), and the main body of Mare Sirenum is visible to the right, but the main body of Mare Sirenum is not recorded. Instead, its position is recorded as yellowish and bright. I also observed around the same time, and Mare Sirenum looked faint. This was probably a problem caused by the observation conditions.

(by 2 observations; reported by Makoto Adachi)
