

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2024 年 5 月 10 日 (2024, May. 10)

眞島は Mare Sirenum (140W~170W,-30)付近を観測した。5月9日にははっきりした姿を記録できなかったが、今日は暗部として記録できている。ダストのベールに覆われてはいるものの目立った変化ではなかったようだ。SPC は見えにくい向きになっているが、かなり小さくなってきている。

Mashima observed the area around Mare Sirenum (140W~170W,-30). On May 9, I was unable to record a clear image, but today I was able to record it as a dark area. Although it was covered by a veil of dust, there did not seem to be any noticeable change. The SPC is now in a direction that makes it difficult to see, but it has become quite small.

(by 1 observation; reported by Makoto Adachi)
