

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

井上の画像では Sinus Sabaeus (320W~350W,-10)が東の端だけ記録されており、中央部や Meridiani (0W,-5)は、写っていない。かなり大きなダストストームに成長している。Argyre (30W,-50 )方面の記録がないため、西への広がりには分からない。残念だ。

Inoue's image shows only the eastern edge of Sinus Sabaeus (320W~350W,-10), and does not show the center or Meridiani (0W,-5). It has grown into a fairly large dust storm. There is no record of the Argyre (30W,-50) area, so we do not know how far it spreads to the west. That's unfortunate.

(by 1 observation; reported by Makoto Adachi)
