

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2024年5月27日 (2024, May. 27)

今日は、一人だけの観測報告を受けた。Mare Sirenum (140W~170W,-30)の写り方が、少し淡くなったように見える。ただしリムに近くなったこともあるので、これは筆者の感覚的判断である。前日にも見られたが、SPC から Daedaria (W120,-30)方面に白雲が伸びていて、B画像でも記録されている。NPR は明るくなく、白雲などは見えていない。

Today, I received only one observation report. Mare Sirenum (140W~170W,-30) seems to have become a little fainter. However, this is due to the fact that it has become closer to the limb, so this is just my own judgment. As seen the day before, white clouds stretched from SPC toward Daedaria (W120,-30), and were also recorded in the B image. NPR was not bright, and no white clouds were visible.

(by 1 observation; reported by Makoto Adachi)
