

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

Eridania (200~230W, -35~-55)と Ausonia (W235~270, -55~-20)が明るく赤っぽく記録された。ダストベールに覆われているが、砂漠の色が分かるくらい淡くなっている様子が見られる。BにはSPC周囲が白っぽくなっている様子が記録されている。SPC付近には南極雲が広がっているらしい。

Eridania (200~230W, -35~-55) and Ausonia (W235~270, -55~-20) were recorded as bright and reddish. They are covered by a dust veil, but it appears to be faint enough that the color of the desert can be seen. The B image records that the area around SPC is whitish. It seems that spc is spreading near SPC.

(by 1 observation; reported by Makoto Adachi)
