

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2024 年 11 月 16 日 (2024, Nov. 16)

井上は、厳しい条件の中で観測を行った。シーイングが悪いため、NPC がはっきり写らなかった。Chryse (35W,+10)付近はダスティーだが Xanthe (W53,+15)付近のダスティーな状態はなくなりつつあるように見える。Mare Acidarium (20~45W,+40~55)から Tempe (50W~90W,+45)にかけては赤っぽく記録され、地肌が透けて見えている。F J Melillo の画像からは、前日と同じ様子が記録されている。

Inoue observed under difficult conditions. Due to poor seeing, NPC was not clearly visible. Chryse (35W, +10) was dusty, but the dusty condition around Xanthe (W53, +15) seemed to be disappearing. Mare Acidarium (20~45W, +40~55) to Tempe (50W~90W, +45) were recorded as reddish, and the ground surface was visible through the image. F J Melillo's image recorded the same state as the previous day.

(by 2 observations; reported by Makoto Adachi)
