

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2024 年 11 月 19 日 (2024, Nov. 19)

今日は一人だけの観測だった。前日の 11 月 18 日は欠測となって、ここ数日観測数が減って残念である。Frank J Melillo の観測は Dioscuria (W305-330, +50) 地方が白っぽく記録されている。これはかすかな NPH が写っているからで、よく見ると NPC とは色が微妙に違っている。砂漠の色が透けて見えているためだろう。

There was only one person observing today. The previous day, November 18th, was a missed observation, and the number of observations has unfortunately decreased in the past few days. Frank J Melillo's observations recorded the Dioscuria (W305-330, +50) region as whitish. This is because a faint NPH was captured, and if you look closely, you can see that the color is slightly different from the NPC. This is probably because the color of the desert is showing through.

(by 1 observation; reported by Makoto Adachi)
