

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

火星の視直径はほぼ 5 秒しかないが、NPC が火星の縁よりも内側に記録され、よい観測条件だったことが分かる。青空中の観測のため、白雲の様子は分からないものの、ターミネータ付近には、かすかに白雲が記録されている。北半球の高緯度は良く晴れているようだ。

The apparent diameter of Mars is only about 5 arcseconds, but the NPC was recorded inside the edge of Mars, which shows that the observation conditions were good. Since the observation was taken in clear sky, the appearance of white clouds cannot be seen, but faint white clouds were recorded near the terminator. It seems that the high latitudes of the Northern Hemisphere are very clear.

(by 1 observation; reported by Makoto Adachi)
