観測は一人だけだった。ここしばらく Syrtis Major (293W,+0~20)付近の観測はなかったが、様子が分かった。Syrtis Major は相変わらず雲に覆われていることが分かった。それ以外のところについては、情報不足ではっきりしなかった。

There was only one person observing. There hadn't been any observations around Syrtis Major (293W,+0~20) for a while, but I was able to see what it was like. I found out that Syrtis Major was still covered in clouds. Other than that, there was a lack of information and it was unclear.
