

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

観測報告は一人だけとなった。渡辺は Hellas (275~315W, -30~60) が白っぽい様子を記録している。NPC と比べると輝きは鈍く、この経度では、雲を見ているのだろう。前日に見られた Cydonia (W340-5, +53) のローカルダストストームは淡くなって、Cydonia の姿が見えてきている。終息してきたようだ。それに伴い NPC はますます黄色っぽくなった。

Only one person reported the observation. Watanabe recorded that Hellas (275~315W, -30~60) looked whitish. Its brightness was duller than that of NPC, and at this longitude, he must have been looking at clouds. The local dust storm of Cydonia (W340-5, +53) seen the previous day had become fainter, and Cydonia was coming into view. It seems to have subsided. As a result, NPC became more and more yellowish.

(by 1 observation; reported by Makoto Adachi)
