

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 7 月 10 日 (2025, Jul. 10)

Clyde Foster の観測を、前日と比べてみた。7 月 10 日の画像は 9 日と画像処理の状態が違っていて、単純に比較することができなかった。筆者が見た目では、変化があったようには見えなかった。Meridiani (0W,-5)の南北の大きさが短くなっているのは、白雲の影響なのかもしれない。B 画像を見ると、Meridiani の真上に、模様を遮るような白雲は見られない。

I compared the observations of Clyde Foster with those of the previous day. The image on July 10 was processed differently from the image on the 9th, so it was not possible to simply compare them. I did not see any changes. The shortening of the north-south size of Meridiani (0W,-5) may be due to the influence of white clouds. Looking at image B, there are no white clouds directly above Meridiani that would block the pattern.

(by 1 observation; reported by Makoto Adachi)
