

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 7 月 23 日 (2025. Jul.23)

今日も Frank J Melillo からの観測だが、今日は RGB 画像がある。前日の 7 月 22 日の観測では Sinus Sabaeus (320W~350W,-10)の東半分が淡くなっていたが、B 画像ではこの一帯が白っぽく記録され、白雲によって淡く記録された様子が見えてくる。明け方の低緯度帯は白雲が目立っている。

Observations from Frank J Melillo again today, but today we have RGB images. In the observation on the previous day, July 22nd, the eastern half of Sinus Sabaeus (320W~350W, -10) appeared faint, but in the B image this area appears whitish, and it appears to have been faintly recorded by white clouds. White clouds are prominent in the low latitudes at dawn.

(by 1 observation; reported by Makoto Adachi)
