

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

伊藤から報告を受けた。画像を見る限り、NPC が不明瞭に見える。おそらくダストに覆われているためだろう。Syrtis Major (293W,+0~20)の写り方を見ると、Sinus Sabaeus (320W~350W,-10)がもっと見えやすくなっていないといけないが、この付近もダスティーなのだろう。Hellas (275~315W,-30~60)は霜のようで、白く明るく記録された。

I received a report from Ito. Looking at the image, the NPC appears unclear, probably due to dust covering it. Judging from the way Syrtis Major (293W, +0~20) is captured, Sinus Sabaeus (320W~350W, -10) should be more visible, but this area is probably also dusty. Hellas (275~315W, -30~60) looks like frost, and was recorded as a bright white.

(by 1 observation; reported by Makoto Adachi)
