

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

Frank J Melillo の画像は、写りが悪いように見えるが、Propontis (180w,+45)の暗斑が写っている。また、Mare Sirenum (140W~170W,-30)もわずかに見えていて、なかなか良く撮れていると思う。Tharsis (80W~120W,+10)付近が明るく記録されているが、白雲による姿かどうかまでははっきりしない。

Frank J Melillo's image appears to be poorly captured, but it does show the dark patch of Propontis (180W, +45). Mare Sirenum (140W-170W, -30) is also slightly visible, so I think it's a pretty good image. The area around Tharsis (80W-120W, +10) is recorded as bright, but it's unclear whether this is due to white clouds.

(by 1 observation; reported by Makoto Adachi)
