Rudolf A. Hillebrecht から観測報告が送られてきた。Sinus Sabaeus (320W~350W,-10)や Meridian (0W,-5)がコントラストが低いものの、よく記録されている。この経度での観測では NPC が記録されている。2 枚の画像は 26 分差の画像で、立体視すると面白い。Hellas (275~315W,-30~60)の白さが目立って見える。

Rudolf A. Hillebrecht sent us an observation report. Sinus Sabaeus (320W~350W,-10) and Meridian (0W,-5) are well recorded, although the contrast is low. NPCs were recorded in observations at this longitude. The two images are 26 minutes apart, and are interesting to view in stereo. The whiteness of Hellas (275~315W,-30~60) stands out.

(by 1 observation; reported by Makoto Adachi)
