

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 9 月 18 日 (2025, Sep. 18)

今日はカラー画像の報告も受けた。Ls は 142° で、そろそろ赤道帯霧も終息してくる時期になるが、この付近の雲はまだ健在のようだ。視直径は 4 秒だが、よく記録できていて素晴らしい。Argyre (30W,-50) が明るく、雲が見えているように見える。Ls 160° くらいまでは、雲の見えることが多いため、今回明るいののは普通の姿だと言える。

I also received a report of color images today. The Ls is 142° , and although the equatorial fog will soon be clearing up, the clouds in this area still seem to be there. The apparent diameter is 4 arcseconds, but the recording is excellent. Argyre (30W,-50) is bright, and clouds appear to be visible. Clouds are often visible up to about Ls 160° , so the bright appearance this time is normal.

(by 1 observation; reported by Makoto Adachi)
