

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

荒川は BE410+IR/UVcut の画像で地表の模様を記録した。左側の B 画像と比べると、衝に近い時の写り方の差がよくわかる。Solis Lacus 付近に東西方向に白いバンドができているが、これらは地表の模様と比べると、雲ではないことが分かる。気をつけなければならない。

柚木の画像では、Noachis の東部がリムで黄色く記録されている。ダスティーになっているのだろう。

(by 26 observations; reported by Makoto Adachi)

Arakawa recorded the surface pattern with the image of BE410 + IR / UVcut. Compared to the B image on the left, you can clearly see the difference in how it looks when it is close to the opposition.

White bands are formed in the east-west direction near Solis Lacus, but these are not clouds when compared with the pattern on the surface of the earth. You have to be careful.

In the image of Yunoki, the eastern part of Noachis is recorded in yellow on the limb. It must be dusty.
