

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

Hellas (275~315W,-30~60)から東に伸びたダストに変化は見られない。Hellas から東に広がったダストは、白雲と一緒にっており、B 画像でも明るくなって見える。SPC は、0 W の経度からは、明らかに小さくよく見える。

(by 10 observations; reported by Makoto Adachi)

There is no change in the dust extending east from Hellas (275 ~ 315W, -30 ~ 60). The dust that spreads east from Hellas is accompanied by white clouds and appears bright in the B image. The SPC looks clearly smaller and better from a longitude of 0W.
