

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2021 年 1 月 22 日

3 人の観測者の記録は、いずれもリムを明るく記録している。明るさの原因は Tiziano Olivetti のリムの画像によく表れている。Tempe (50W~90W,+45)付近は台地になっている。極域を取り囲む西風によって、ダスティーになったのだと思われる。南半球は靄が原因だろう。色が明らかに違っている。

(by 3 observations; reported by Makoto Adachi)

2021, Jan. 22

The records of the three observers all record the limb brightly. The cause of the brightness is well represented in the Titian Olivetti limb image. The area around Tempe (50W ~ 90W, + 45) is a plateau. It seems that the westerly wind that surrounds the polar region made it dusty. The Southern Hemisphere is probably caused by haze. The colors are clearly different.
