

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2021 年 2 月 2 日

井上は、Yaonis (320W, -40) 付近が非常に明るくなっている様子を記録したが、これは Hellsa の西の端の明るい部分が、二重リムの影響を受けて、単独の明部になって記録されたものと思われる。同じ日の伊藤の画像では記録されていないこと。翌日の 2 月 3 日にも何も変化がないことで、判断した。

(by 7 observations; reported by Makoto Adachi)

2021, Feb. 2

Inoue recorded that the area around Yaonis (320W, -40) was very bright, but this was because the bright part at the western end of Hellsa was affected by the double limb and became a single bright part. It seems that it was recorded. It is not recorded in the image of Ito on the same day. It was judged that there was no change on February 3rd, the next day.
