

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2021年2月20日

Mare Sirenum (140W~170W,-30) の姿が分かりにくくなった。北西側半分がダストに覆われて淡くなっている。また、Mare Cimmerium (W180~W250,-40~0) の南東側も同じダストに覆われて淡くなっている。Clyde Foster は Syrtis Major 地域の観測をした。注目される Hellas は、最も明るい部分が少し南に移動しているように見える。複数の観測がほしかった。

(by 7 observations; reported by Makoto Adachi)

2021, Feb. 20

The appearance of Mare Sirenum (140W ~ 170W, -30) became difficult to understand. The northwestern half is covered with dust and is faint. Also, the southeast side of Mare Cimmerium (W180 ~ W250, -40 ~ 0) is covered with the same dust and becomes faint. Clyde Foster made observations in the Syrtis Major area. Attention Hellas seems to have the brightest part moving a little south. I wanted multiple observations.
