

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2021 年 3 月 1 日

北極地方は明るいフードと思われる白雲が目立つようになった。一部、非常に明るいところもあり、部分的に NPC が見えているものと思われる。今日の画像を見る限り、北半球に目立った変化は見られない。

南半球は Mare Sirenum の南方に顕著な白雲が見られる。また、Clyde Foster の B 画像では低緯度地方に氷晶雲のような雲が記録されている。

2021, Mar. 1

In the Arctic region, white clouds, which seem to be bright food, have become conspicuous. Some parts are very bright, and it seems that NPCs can be seen partially. Looking at today's images, there are no noticeable changes in the Northern Hemisphere.

In the Southern Hemisphere, prominent white clouds can be seen to the south of Mare Sirenum. In Clyde Foster's B image, clouds like ice crystal clouds are recorded in low latitudes.
