

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

伊藤の Stack only の画像を見ると、Arabia (310W~330W~+35~+10)付近が赤っぽくなっている。筆者は猛烈に悪いシーイングだったが、SPR が全く明るく見えなかったので、記録をとった。伊藤の画像は SPR に白雲のない姿を記録しており、筆者の見た様子が正しかったことがわかった。Dmitry W. von Aichegg は Solis Lacus の西側がぼんやり黒く記録され、元の姿に戻っている様子を記録した。

2021、Mar. 10

Looking at the image of Ito's Stack only, the area around Arabia (310W ~ 330W ~ + 35 ~ + 10) is reddish. I had a terribly bad seeing, but he set a record because the SPR didn't look bright at all. Ito's image recorded the appearance without white clouds in the SPR, and it turned out that the appearance I saw was correct. Dmitry W. von Aichegg recorded the west side of Solis Lacus being vaguely black and returning to its original form.
