

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2021 年 3 月 20 日

Mare Acidarium (20~45W,+40~55) の中央を横切るような雲の帯が Zsolt Kereszty によって記録された。IR でも記録されており、ダスト混じりのようだ。Chris Nuttall は Chryse (35W,+10)を観測しているが、前日のような明るさを記録していない。今シーズンは Oxia palus (8W,+12) の西側が明るく見えることが多いが、特別ものではない。

(by 4 observations; reported by Makoto Adachi)

2021, Mar. 20

A cloud band across the center of Mare Acidarium (20 ~ 45W, + 40 ~ 55) was recorded by Zsolt Kereszty. It is also recorded in IR, and it seems to be mixed with dust. Chris Nuttall observes Chryse (35W, + 10), but does not record the brightness of the previous day. The west side of Oxia palus (8W, + 12) often looks bright this season, but it's not special.
