

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2022年2月15日

今日も前日と大きく変わらない。NPRがかなり黄色っぽく、やはり昨日からダストに覆われたように見える。目立った濃い部分はなく、ダストストームではないようだ。画像ではこの視直径なのに、Propontis (180w,+45)が記録されていて、驚いた。

2022, Feb. 15

Today is not much different from the day before. The NPR is quite yellowish and still looks like it's been covered in dust since yesterday. There is no noticeable dark part, and it does not seem to be a dust storm. I was surprised that Propontis (180w, +45) was recorded in the image even though it had this apparent diameter.
