

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2022年3月7日

前回の観測から3日間開いた。火星面の様子は3月4日と変わらない。3月4日には Aurorae Sinus (53W,-10)の東半分は晴れていたが、今日はダストに覆われ、黄色っぽく見えている。そのかわり、Argyre (30W,-50)の東側だけが晴れて暗くなったすがたをみせている。

(by 1 observation; reported by Makoto Adachi)

2022、Mar. 07

It has been open for 3 days since the last observation. The appearance of the surface of Mars is the same as March 4. The eastern half of Aurorae Sinus (53W, -10) was sunny on March 4, but today it is dusty and looks yellowish. Instead, only the eastern side of Argyre (30W, -50) appears to be sunny and dark.
