

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2022 年 3 月 23 日 (2022, Mar. 23)

井上の観測条件は非常に悪く、詳細は分からない。しかし、Aurorae Sinus (53W,-10)が記録されていない。Solis Lacus (W90;-28)は暗部として記録されたが、形まで記録することはできなかった。Raimondo Sedrani は IR 画像を報告してきた。本来なら Hellas は円形に写らなければならないが、今日は輪郭すら見えない。かなり濃いダストに覆われているようだ。IR なので Moeris(280W,+10)が記録されてもよさそうだが、画像では見られない。悪シーイングのせいかもしれない。

Inoue's observation conditions are very bad, and details are unknown. However, Aurorae Sinus (53W, -10) has not been recorded. Solis Lacus (W90; -28) was recorded as a dark area, but could not be recorded in shape. Raimondo Sedrani has reported IR images. Originally, Hellas should appear in a circle, but today I can't even see the outline. It seems to be covered with fairly thick dust. Since it is IR, Moeris (280W, + 10) may be recorded, but it cannot be seen in the image. It may be due to bad seeing.

(by 2 observations; reported by Makoto Adachi)
