

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

Mark Lonsdale は日本で見える地域と同じ地域を観測した。日本は天気が悪く観測はない。気にしていた Chryse (35W,+10)には目立った変化はなかった。画像は、全体がかなりダスティーな状態を記録している。前日に安達が同じ地域を観測しているが、肉眼ではもう少し模様が黒く見える。SPC の周囲が白くにじんでいる様子を見ると、観測条件はかなり悪かったようだ。

Mark Lonsdale observed the same area as seen in Japan. There are no observations in Japan due to bad weather. There was no noticeable change in the Chryse (35W, + 10) I was concerned about. The image records a fairly dusty condition as a whole. Adachi observed the same area the day before, but the pattern looks a little blacker to the naked eye. Looking at the white bleeding around the SPC, it seems that the observation conditions were quite bad.

(by 1 observation; reported by Makoto Adachi)
