

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2022 年 7 月 8 日 (2022, Jul. 08)

今日は二人の観測者からの報告を受けた。ほぼ同じ経度を観測している。双方とも、北半球と南半球のリムを明るく記録している。南半球は、Hellas (275~315W,-30~60)の塵と朝霧がまじりあった姿で、北半球は Ishidis (270W,+23)盆地の雲だろう。Mare Cimmerium (W180~W250,-40~0)の北端は、今日もはっきり見ることができなかった。

I received reports from two observers today. We are observing almost the same longitude. Both have brightly recorded rims in the northern and southern hemispheres. The southern hemisphere is a mixture of Hellas (275 ~ 315W, -30 ~ 60) dust and morning mist, and the northern hemisphere is probably the Ishidis (270W, + 23) basin clouds. The northern end of Mare Cimmerium (W180 ~ W250, -40 ~ 0) was not clearly visible today.

(by 2 observations; reported by Makoto Adachi)
